PhD Graduate Assistantship in Soil Hydrology

A three-year PhD assistantship is available at the University of Wyoming in Laramie. The successful candidate will combine climate, vegetation, and soil moisture data with numerical modeling to study drought conditions in Wyoming rangelands. Students interested in the modeling of soil water flow, soil heat transport, and soil-plant-atmosphere interactions are encouraged to apply. Funding is available from January 2010 onwards. Stipend for the nine-month academic year, additional summer stipend, tuition and fee reduction, and health insurance are provided. To apply, email a statement of interest, resume, GPA and GRE scores, and contact information for three references to tkellene@uwyo.edu. For more information contact Thijs Kelleners, Assistant Professor Soil Physics, Department of Renewable Resources at 307-766-4279 or visit the department website at http://uwadmnweb.uwyo.edu/UWrenewable/.
